Profile Summary:

Full Stack Developer with experience in Angular, Node.js, and ASP.NET. Skilled in building responsive frontend interfaces and scalable backend systems. Proven ability to deliver real-world projects, collaborate across teams, and solve complex problems with clean, maintainable code. Passionate about continuous learning and web innovation.

Education:

- **9-M Postgraduate Diploma, Professional Training Program, Information Technology Institute (ITI), Mansoura, Egypt.**
 - **Track:** Professional Development & BI Infused CRM

Oct 2024 – Jun 2025
 - **Bachelor of Computers and Information, Tanta University. Egypt**
 - **Department:** Computer Science **Grade:** Very Good with Honors (**85.73%**)
 - **Graduation Project:** “Mealy Food System” **Grade:** Excellent

2020 – 2024
-

Skills:

- **Programming Languages:** C, C++, C#, JavaScript
 - **Frontend Technologies:** HTML5, CSS3, Angular, jQuery
 - **Backend Technologies:** Node.js, .NET MVC, Entity Framework Core
 - **Databases:** SQL Server, MongoDB
 - **Agile Methodologies**
 - **Business Intelligence:** Power BI
 - **Source Control:** Git, GitHub
 - **Data Structures and Algorithms**
 - **Object-Oriented Programming (OOP)**
 - **Design Patterns**
-

Projects:

1. Examination Management System

Tools: ASP.NET MVC, Entity Framework, SQL Server

Description:

- Developed a scalable **three-portal system** (Student, Instructor, Admin) to streamline exam scheduling, grading, and course management for educational institutions.
- Implemented **dynamic exam unlocking** for students based on scheduled dates, with filtering and detailed performance analytics.

- Enabled instructors to **generate exams** (MCQ/True-False) by department/branch and track student progress, reducing manual grading efforts by 30%.
- Built **admin CRUD operations** for courses, question banks, and user roles, improving system maintainability and reporting efficiency.
- Collaborated with stakeholders to align features with institutional workflows, ensuring high usability and performance.

2. Multi-Actor E-commerce & Inventory System

Tools: Angular, Node.js, MongoDB

Description:

- Scaled the backend to handle **concurrent users** with 99.9% uptime by optimizing API endpoints and MongoDB indexing.
- Integrated **real-time inventory tracking**, reducing stock discrepancies by **40%** for sellers.
- Designed **role-based dashboards**, improving admin efficiency by **50%** in processing orders and analytics.
- **Collaborated with team** to align functionality with user needs and business goals.

3. Ecommerce Application

Tools: HTML, CSS, JavaScript, Bootstrap, jQuery

Description:

- Developed a **customer-facing UI** that reduced product search time by **30%** through optimized filters and lazy loading.
- Built **Admin/Seller dashboards** that reduced inventory management time by **35%** via automated stock alerts.
- Ensured **responsive design** using Bootstrap and enhanced interactivity with jQuery.
- **Led the team**, overseeing project planning, task distribution, and quality assurance to ensure timely delivery.

4. Fresh Cart

Tools: HTML, CSS, JavaScript, Bootstrap, jQuery, React.js

Description:

- Designed a **responsive user interface**, improving product discovery speed through advanced filtering and **lazy loading**.
- Built **Admin and Seller dashboards** that improved inventory oversight.
- Implemented a **mobile-friendly design** using Bootstrap, ensuring seamless user experience across all devices.
- Leveraged **React Router** for smooth navigation and Context API for efficient state management.

Languages:

- **Arabic:** Native
- **English:** Intermediate
