Profile Summary

Motivated .NET Full Stack Developer with expertise in ASP.NET [↗](#) MVC, Entity Framework, SQL Server, and frontend technologies like Angular, Bootstrap, HTML, CSS, and JavaScript. Passionate about building scalable applications and continuously learning new technologies. Known for strong communication, time management, multitasking, and adaptability in team settings.

Education

9-Month Postgraduate Diploma, Professional Training Program, 10/2024 – 06/2025
Information Technology Institute (ITI) Mansoura, Egypt

- **Track:** Professional Development & BI-infused CRM
- **Job Profiles:** Front-End Developer,.NET Full stack Developer

Mansoura University 09/2020 – 07/2024
Bachelor of Computer Science Mansoura, Egypt

- **Grade:** Excellent | **Rank:** 10th
- **Graduation Project:** **Grade:** Excellent
E-Learning Platform Powered by AI Developed an e-learning website that uses AI to personalize learning paths,

Projects

E-commerce System | HTML5, CSS3, JavaScript [↗](#)

Built a responsive e-commerce web application using HTML, CSS, and JavaScript with an intuitive interface and real-time updates.

- **Admin:** Manage product catalog and oversee platform operations.
- **Seller:** List products, track orders, and manage sales.
- **Customer:** Browse products, manage shopping cart, and place orders.

Inventory Management System for E-commerce Application [↗](#)

Developed a role-based e-commerce platform using Angular and Node.js, featuring separate portals for Admin, Sellers, Customers, and Clerks. The system efficiently manages inventory, orders, and user roles to streamline operations.

Key Features:

- **Customers:** Browse products, place orders, and track order history.
- **Sellers:** Register, request approval from Admin, and manage products and inventory.
- **Admin:** Manage sellers, products, branches, roles, and clerks.
- **Clerks:** Manage branch inventory and send stock requests to Admin.

Technology Stack:

- **Frontend:** Angular
- **Backend:** Node.js with Express for handling API
- **Database:** MongoDB

Examination System [↗](#)

Developed a comprehensive examination system entirely using .NET MVC, designed to facilitate the creation, management, and grading of exams. The system supports multiple user roles, including Admin, Instructor, and Student.

Key Features:

- **Admin:** Manage users, exams, and student accounts with full system control.
- **Instructor:** Create and manage exam questions, define exam formats (e.g., multiple-choice, short answer), and grade exams.
- **Student:** Take exams, view results, and track progress.
- **Question Bank:** Centralized repository for creating, editing, and reusing exam questions.
- **Real-time Grading:** Automatic grading for objective questions and manual grading for subjective answers.

Technology Stack:

- **Backend:** .NET MVC
- **Frontend:** HTML, CSS, JavaScript
- **Database:** SQL Server

AI Project

Fake News Detection [↗](#)

Developed a model to detect fake news using Python, achieving 92% accuracy. Tasks included data preprocessing, feature extraction with TF-IDF, and model training with logistic regression. Technologies used: Python, Pandas, Scikit-learn, and NLTK. Skills demonstrated: machine learning, natural language processing, and data analysis

Bart_SP Model [↗](#)

Developed a text summarization model using the BART architecture on Hugging Face. Tasks included data preprocessing, model fine-tuning, and evaluation. Technologies used: Python, Hugging Face Transformers, PyTorch. Skills demonstrated: natural language processing, model fine-tuning, and data handling.

Courses

NTI Artificial Intelligence (AI)

Successfully completed the summer training course 2021 for 4 weeks (120 hours)

ITI Computer Vision Training

Successfully completed 4-week summer training course 2023 (120 hours) with online live sessions, earning a certificate in Computer Vision.

Entrepreneurship From Innovegypt

Successfully completed a (45 hours) training course 2022 and developed a final project for potential startup

Machine Learning: Regression [↗](#)

Skills

Programming Languages:

C, C++, C#, JavaScript

Frontend Technologies:

HTML5, CSS3, Angular, jQuery, Bootstrap

Backend Technologies

Node.js, .NET MVC, Entity Framework Core

Databases

SQL Server, MongoDB

Business Intelligence

Power BI

Source Control

Git, GitHub

Object-Oriented Programming (OOP)

Design Patterns

Languages

Arabic

English
