Military Status: exemption

Summary

ITI graduate and Computer Science graduate with strong expertise as a Full Stack Developer specializing in Angular and .NET technologies. Skilled in developing robust web applications using ASP.NET Core, Entity Framework, SQL Server, and modern front-end technologies. Proven ability to deliver scalable, maintainable solutions through clean code and effective teamwork. Strong technical problem-solving skills with a focus on creating responsive and usercentered experiences. Dedicated to continuous learning and professional growth within the dynamic field of software development.

Education

9-Month Postgraduate Diploma, Professional Training Program, Information Technology Institute (ITI), Mansoura, Egypt October 2024 - June 2025.

- **Track:** Professional Web Development.
- **Job Profiles:** Full Stack (.NET & Angular) Developer -MEARN stack-BI- CRM.

Bachelor's Degree in Computer Science
Faculty of Computers and Information, Kafr Elsheikh University

- **Graduation date:** July 2024.
- **Graduation Project: "Psychiatric Clinic Using AI"**
 - Grade:A+
 - Developed a mental healthcare website featuring two AI models: A diagnostic questionnaire to identify potential mental disorders with high accuracy.
 - A conversational chatbot that assesses the need for medical intervention.
 - Users register to access the system, interact with AI models from home, maintain chat history, and receive personalized recommendations or prescriptions. The platform provides educational mental health articles and continuously.

Professional Trainings & Courses

- ITI Summer Course, Social Media Marketing: Sep. - Oct. 2023.

Freelance Experience

University Council Management System .

- **Tools:** Angular 19, TypeScript, RxJS, NgBootstrap, custom PDF/Word document

- **Description:**

- Developed a comprehensive web-based Council Management System for a Saudi Arabian university's Faculty of Business Administration. This enterprise application streamlines administrative workflow by digitizing the council meeting process from agenda creation through report generation and approval tracking.

- **Key Responsibilities & Achievements:**

- Full-stack development of a complex Angular application handling critical academic administrative processes
- Implemented specialized PDF & Word document generation with proper bilingual (Arabic/English) support.
- Designed and implemented dynamic form system* supporting 8+ administrative workflows including:
 - - Faculty hiring approvals
 - - Conference participation requests
 - - Academic scholarship processing
 - - Faculty promotion applications
 - - Scientific publication award submissions

- **Business Impact:**

- Created a solution that reduced administrative processing time by 70%, eliminated paper-based workflows, and provided a consolidated digital repository of council decisions. The system's document generation capabilities ensured consistent formatting and bilingual support, critical for academic accreditation requirements.

Open-source projects:

eCommerce & Inventory Management System .

- **Tools:** Angular 19, Node.js, Express.js, MongoDB, JWT, Angular Material, Stripe, ImageKit
- **Description:**
 - Developed a comprehensive platform integrating online shopping with offline branch operations, featuring specialized portals for multiple user roles.
 - Admin Dashboard: Full control over store management, inventory, users, sales analytics, and branch operations.
 - Sales Clerk Portal: Manage in-store inventory and process branch orders.
 - Seller Dashboard: Add, manage, and monitor products and sales performance.
 - Cashier Interface: Handle in-store sales transactions and order processing.
 - Customer Portal: Browse products, place orders, track order status, and manage user profiles.

ITI Examination System.

- **Tools:** ASP.NET Core MVC, Entity Framework Core, SQL Server, HTML/CSS, JS, Bootstrap, jQuery
- **Description:**
 - A comprehensive multi-portal web application built with ASP.NET Core Razor Pages to streamline academic assessment and course management for educational institutions.

- Student Portal: Secure exam access with automatic time-based availability, personalized dashboard with course enrollments, comprehensive performance tracking, and real-time grade visibility.
- Branch Manager Portal: Complete management of local branch resources including courses, instructors, students, and exams with appropriate data isolation to maintain branch autonomy.
- Super Admin Portal: Enterprise-wide system administration with comprehensive CRUD operations for all system entities, cross-branch reporting, and advanced user management capabilities.
- Instructor Portal: Advanced exam creation tools with MCQ/True-False question types, student performance analytics, custom exam generation for tracks or individual students, and course material management.

- **Technical Implementation:**

- **N-tier architecture with Repository Pattern and Unit of Work for improved maintainability**
- **Entity Framework Core with optimized stored procedures for complex database operations.**
- **Role-based authorization with fine-grained permission controls.**
- **Responsive design using Bootstrap for seamless mobile and desktop experiences**
- **Modular system design with dependency injection for testability and flexibility**
- **.Comprehensive validation with both client and server-side checks**

E-Commerce Web Application TechStore.

- **Tools:** Frontend: HTML5, CSS3, Bootstrap, JavaScript,Storage & Session Management: localStorage (used for user authentication and session persistence)
- **Description:**
 - Developed a comprehensive e-commerce platform specializing in tech products, with separate portals for Customers, Sellers, and Admins.
 - Customers: Browse and search products, add items to the cart, place orders, and manage personal order history.
 - Sellers: Create and manage product listings, track inventory, view customer orders, and access sales reports via a seller dashboard.
 - Admins: Manage user accounts (Customers, Sellers, Admins), approve or reject seller registrations, oversee all product listings, review customer feedback, and monitor platform-wide analytics.
 - Guest Users: Explore products, search by category or keyword, and add items to the cart without creating an account.

Skills

- **Technical Skills:**

- **Programming Languages:** C++,C#, JS,TypeScript
- **Programming Concepts:** Object-Oriented Programming (OOP), Data Structures & Algorithms, SOLID Principles, Design Patterns

- **Database:** SQL server, MongoDB.
- **Front-End Technologies:** HTML5, CSS3, JavaScript, Angular, jQuery, Bootstrap, AJAX, ES6, Razort.
- **Back-End Technologies:** ASP.NET Core MVC, ASP.NET Core Web API, Entity Framework Core, ADO.NET, LINQ, SignalR, JWT, ASP.NET Razor Pages, Node.js, Express.js.
- **Business Intelligence:** Power BI, SQL Server Reporting Services (SSRS), SQL Server Analysis Services (SSAS), SQL Server Integration Services (SSIS)
- **Git, GitHub**
- **Additional Skills:** Microsoft Dynamics 365 CRM, DevOps Practices, Unit Testing, Agile Methodologies
- **Soft Skills:**
 - Teamwork, Communication Skills, Time Management, Presentation Skills, Leadership Skills.
- **Languages:**
 - **Arabic:** Native.
 - **English:** Very Good.
