Projects

- 1- E-Commerce System: [Stack \(JavaScript - jQuery - Bootstrap - HTML5 - CSS3\)](#) | [GitHub](#) 
- 2- Inventory Management System: [Stack \(MongoDB - Express - Angular - Node.js\)](#) | [GitHub](#) 
- 3- Examination System : [Stack \(ASP.NET Core MVC -SQL Server\)](#) | [GitHub](#) 

Bachelor’s degree of Electrical Power and Machines Engineering from Zagazig University.

Sep.2017-July.2022

Cumulative grade: Very good With Honors

Graduation project: " Smart Home Energy Management System Using KNX Protocol" **Grade:** Excellent

Goal of Project:
Developed an intelligent system to automatically control lighting, air conditioning, and electrical appliances to reduce energy consumption and improve efficiency. The system uses the KNX protocol to integrate sensors and controllers through a centralized energy management unit

PROJECTS (ITI)

1- E-Commerce System For Jewelry Store:

Stack: HTML5, CSS3, JavaScript, jQuery, Bootstrap, local Storage
Developed platform for jewelry E-commerce ,The platform offers tailored experiences for Customers, Sellers, Admins, and Guests, with key features **including:**

Guests: Browse jewelry, search, and add items to the cart.

Customers: Browse, search, purchase, manage orders, and send feedback.

Sellers: Add and manage listings, track sales, and monitor inventory.

Admins: Manage users, orders, products, and system-wide statistics.

Key Achievements: Built a dynamic, responsive user interface with a focus on user experience.

Utilized local Storage for secure session and data management.

- **2- E-Commerce and Inventory Management System (MEAN Stack)**

Stack: Angular 19, Node.js, Express.js, MongoDB

Developed a full-featured eCommerce platform for cookie sales with four user portals

(Customer, Seller, Branch Clerk, Admin), featuring:

Customer: Browse, add to cart, and secure payments

Seller: Manage products and track orders.

Branch Clerk: Manage inventory and collaborate with cashier.

Authentication System: Secure role-based access control using JWT.

Achievements: Scalable platform with complete inventory and user management.

3- Examination Management System (in Progress)

Stack: ASP.NET Core MVC – SQL Server.

An intelligent system for managing students, instructors, departments, and branches, with exam generation and performance tracking, utilizing a flexible role-based access control system.

Key Features:

Registering students and assigning instructors to courses.

Managing departments and branches, and distributing staff.

creating custom question banks for each branch.

Generating various types of exams (Multiple Choice, True/False).

Tracking grades and analyzing results.

Advanced role-based access control (Student, Instructor, Branch Manager, System Admin).

TECHNICAL SKILLS

Programming Languages

C, C++, C#, JavaScript

Front-End Technologies

HTML5, CSS3, JavaScript, jQuery,
Bootstrap, Angular , Razor

Programming Concepts

OOP , Data Structures

Database

Microsoft SQL Server , MongoDB

- **Version Control**

Git/GitHub

CRM

Microsoft Dynamic 365 CRM

Back-End Technologies

ASP.Net Core MVC, ASP.Net Core Web API,
ADO.NET, LINQ, Entity Framework Core , JWT,
SignalR, ASP.NET Razor Pages

Business Intelligence

Power BI

MEAN Stack

Node.js , Express.js , TypeScript

SOFT SKILLS

- Self-learning - Time management - Adaption for new Technologies - Collaboration with Teamwork

LANGUAGES

Arabic (Native)

English (Very good)
